

Quality Policy

The Quality Policy of our company is to provide eTendering / eProcurement systems and solutions through the design, development, implementation, support and maintenance of state-of-the-art intellectual property based on customer requirements, statutory and regulatory requirements, and contractual obligations.

We strive hard to achieve customer satisfaction by delivering systems and solutions in a timely manner, never compromising on the safety and security of customer data through our patented 'Secure Bid Process', our proprietary 'Key Manager' process, as well as other industry best practices relating to information security.

We encourage the highest levels of ethics, integrity, sincerity and sense of responsibility in our organizational culture.

We realize that we operate in a dynamic and fast-changing competitive environment that demands that our quality systems and organizational culture continuously improve.
